

Our 7.5" LED Disc Lights are low profile with a simple, clean design to match all decor styles. These light fixtures make it easy to upgrade your existing lighting to energy efficient LED technology. They are easy to install into your 4-5' junction box, and also include a retrofit E26 base connector. With a 15W integrated LED light plate that's equivalent to a 60W incandescent bulb, and a 90+ color rating index, you'll be able to see bright, vibrant colors as they truly are. This light fixture is available in both warm white (3000K) and bright white (4000K) color temperatures and is compatible with triac dimming controls to effortlessly control the amount of light in the room. These disc lights are perfect for kitchens, hallways, living rooms, bedrooms, laundry rooms, and closets, and they're even suitable for use in damp locations, such as a bathroom.
